

ISU PETASYS Energy Policy

1. Scope and Purpose of the Energy Policy

ISU PETASYS Co., Ltd. strives to conduct business activities that prioritize responsibility to the company and society, in accordance with management principles that place sustainability as the foremost value.

2. Detailed List of Energy Policy

(1) Compliance with Domestic and International Energy Laws and Regulations

We comply with energy laws and international agreements, establishing and implementing enhanced internal standards.

(2) Energy Leadership

Based on the CEO's commitment to ESG management, we actively promote environmental management to become a leading energy company in our industry.

(3) Climate Crisis Response and Carbon Neutrality

Recognizing the climate crisis as humanity's long-standing challenge for preserving the global environment, we actively respond to the crisis through greenhouse gas reduction, energy efficiency, and expanded renewable energy use, achieving carbon neutrality in the mid-to-long term.

(4) Energy Management

We establish a global-standard energy management system (ISO 50001), set and manage energy targets across all business areas, and continuously strive to enhance energy performance.

(5) Implementation of Eco-Friendly Production Processes

We reduce pollutant and chemical emissions, energy consumption, and water usage during production, while promoting the reuse and recycling of wastewater and waste.

We continuously strive to achieve renewable energy and carbon neutrality goals and respond to global climate change.

We recognize the importance of biodiversity conservation and strive to preserve the natural environment.
